Purpose of the proposal and its anticipated effects, including any changes in existing rules: In 1993, the R-4 occupancy designation was replaced with licensed care occupancies in the adopted Washington state uniform codes. In the 2006 international version of the codes, Washington removed licensed care occupancies and distributed those facilities to the appropriate I and R occupancies classifications, while continuing to strike the unneeded R-4 occupancy classification. The International Code Council model codes have evolved to include an enhanced building science model for the R-4 designation that includes mitigations for both active and passive fire and life safety systems. There is no longer a reason for non-adoption of R-4 occupancy group.
